Building work, replacements and repairs to your home

Read this before starting any work

Many jobs in the home need to be notified to and approved by your Local Authority Building Control unless carried out by an installer who is registered with a Competent Person Scheme. Some examples are shown below (those marked * may not need to be notified in certain circumstances).

- Installing electricity to a shed*
- Replacement windows and doors
- New bathroom installations
- Replacement roof
- Extension to central heating systems*
- Cavity wall insulation
- New or replacement boilers
- Electrical work in kitchens

www.planningportal.gov.uk
What will happen if I do not comply with the Building Regulations?

- If you do not comply the work will not be legal. You could be prosecuted and could face a fine of up to £5000.
- The work may not be safe or could cause health problems. It may also not meet energy efficiency standards.
- If work is found to be faulty your local authority could insist you put it right at your own expense.
- If the work has not been notified or carried out by a registered installer from a Competent Person Scheme you will have no record that the work complies with Building Regulations. This will be important when you come to sell your home as you may be asked to provide certificates of compliance with the Building Regulations.

Why should I use an installer who is registered with a Competent Person Scheme?

- An installer registered with a Competent Person Scheme is qualified to carry out specific types of work in accordance with Building Regulations and will deal with Building Control issues for you. You will usually have access to insurance backed warranties and a robust complaints procedure to use in the unlikely event work is found to be non compliant.
- An installer registered with a Competent Person Scheme will notify the local authority on your behalf and will issue you with a certificate on completion which can be used as proof of compliance. It will also show up on a solicitor’s local authority search when you sell your home.
- If you do not use an installer registered with a Competent Person Scheme then you will have to submit a building notice or full plans application and pay a fee to have Building Control come and inspect the work you have carried out.

How can I find an installer registered with a Competent Person Scheme in my area or check that my chosen installer is with a scheme?

For electrical work visit www.competentperson.co.uk and enter your postcode or the name of the installer in the relevant search box. For all other types of work, contact the Competent Person Scheme operators directly; their details are on the back page.
How to meet the requirements of the Building Regulations

Who is going to do the work?

- Me, a friend or a relative
  - Do Building Control need to know about the work? *(See next page)*
    - No
      - Go ahead with the work. You do not need to contact your Local Authority Building Control Department
    - Yes
      - Tell your Local Authority Building Control Department before starting the work

- A contractor or an installer
  - Do Building Control need to know about the work? *(See next page)*
    - No
      - Yes
        - Is the installer registered with a relevant Competent Person Scheme *(See overleaf)*
  - Yes
    - The installer will look after all the Building Regulations for you. You do not need to contact Building Control. When work is complete you will shortly afterwards receive a certificate of compliance.
Please see below for examples of work that you do or do not need to notify to the local authority before starting. Please note that this list is not complete and there will be other work not listed here that you will need to notify. For some types of work marked * you may not need to notify in certain circumstances. If you are in any doubt you should contact your Local Authority Building Control team for advice.

You **DO** need to tell your Local Authority Building Control about the following work unless you use an installer who is registered with a Competent Person Scheme.

- new installation or replacement of a heating system or any boiler, regardless of fuel type
- new installation or replacement of an oil tank
- installation of a new bathroom or kitchen if existing electrics or plumbing are altered or if new electrics or plumbing are installed
- installation of fixed air conditioning systems
- installation of additional radiators to an existing heating system*
- new electrical installations in bathrooms, kitchens and outdoors*
- replacement window and door units
- replacement of roof coverings on pitched and flat roofs

You **DO NOT** need to tell your Local Authority Building Control about the following work but you can still use an installer who is registered with a Competent Person Scheme.

- most repairs, replacements and maintenance work (except replacements of combustion appliances, oil tanks, electrical consumer units or glazing units which do need to be notified)
- additional power points or lighting points or any other alterations to existing circuits (except in bathrooms, kitchens or outdoors*)
- like for like replacements of baths, toilets, basins or sinks
Below is a list of the types of work covered by Competent Person Schemes. The scheme contact details are overleaf.

Installation of cavity wall insulation: CIGA

Installation of gas appliances: GSR

Installation or replacement of hot water and heating systems connected to gas appliances: APHC, BESCA, CORGI, ELECSA, GSR, HETAS, NAPIT, NICEIC, OFTEC, and STROMA
