

# Oadby & Wigston Output Area Classification

**Output Area Classification by Group**

1a - Terraced Blue Collar	(17)
1b - Younger Blue Collar	(53)
1c - Older Blue Collar	(167)
2a - Transient Communities	(1)
2b - Settled in the City	(17)
3a - Village Life	(175)
3b - Agricultural	(67)
3c - Accessible Countryside	(123)
4a - Prospering Younger Families	(197)
4b - Prospering Older Families	(264)
4c - Prospering Semis	(279)
4d - Thriving Suburbs	(87)
5a - Senior Communities	(19)
5b - Older Workers	(86)
5c - Public Housing	(5)
6a - Settled Housing	(131)
6b - Least Divergent	(161)
6c - Young Families in Terraced Housing	(51)
6d - Aspiring Households	(45)
7a - Asian Communities	(25)
7b - Afro Caribbean Communities	(3)

### Office for National Statistics Population Estimates by Ethnic Group 2002 – 2009

The estimates are experimental estimates which have not yet been shown to meet the rigorous quality standards required of National Statistics. They are consistent with the benchmark mid-year population estimates published by ONS. Though they rely on some assumptions made in statistical models, the estimates by ethnic group provide a level of detail which is not available from survey results. Researchers, local authorities, health authorities and other public and private sector organisations use the estimates to gain an up-to-date picture of the ethnic composition of local populations and to monitor diversity and anti-discrimination programmes.

### Using the Estimates

These estimates are useful in being much more up to date than the 2001 Census and in being able to provide more detail than is possible with survey-based estimates. The estimates will reflect any inaccuracies in the data on which they are based. These include the 2001 Census, the Local Authority Mid-Year Population Estimates, and the estimates of international and within-UK migration published by ONS. Secondly, the statistical models used to produce the estimates rely on assumptions, often based on the 2001 Census.

Source: Department of Work and Pensions

Registrations of overseas nationals per 1000 population for each district have changed from 2002/3 to 2005/6 to 2009/10. In 2005/06, there were 25 registrations per 1,000 population in Leicester City and 4.5 per 1,000 population in Leicestershire County, compared to 11.7 nationally. In 2009, this had fallen to 19 in Leicester City, 2.5 in Leicestershire and 9.3 nationally.

The nationality of those registering in Leicester City, and in the County totalled for 2005/6 to 2009/10, and for the last calendar year 2010.

The highest number of registrations up to March 2010 were from Poland (27% of registrations), followed by India (23% in Leicester and 11% in Leicestershire), but for the year to December 2010 the highest number in Leicester were from India (28%).

Most of those registering are aged 18 to 34. For those aged less than 18 the proportion is insignificant in the UK, but small proportions appear in some Leicestershire districts. Otherwise the proportions in each age group in the subregion are similar to those in the UK.

Only a small proportion (about 10%) registered with an intended stay of more than a year, and the majority with an intended stay of less than 3 months, so these figures mainly count movements of a flexible migrant workforce.

### Population Profile by Age

The % of young people aged 0-24 years is higher in OWBC than Leicestershire, a District Comparator and the UK average

#### ONS Estimated mid-year resident population by five year age group:

##### females
