

Oadby and Wigston Borough Council Local Plan Examination

Inspector's Pre-hearing request for additional information

In preparation for discussions at the forthcoming Hearings in relation to Matter 2, could the Council please provide calculations of five year housing land supply, applying both a 5% and 20% buffer to both the Local Plan base requirement and the shortfall (as referred to in the Inspector's Initial Questions to the Council (Q7)) combined.

In other words:

LP requirement for 5 years + shortfall (under provision from evidence base date to adoption date) + buffer = 5 year HLS target

Based on each calculation what is the supply surplus or deficit measured against this 5 year HLS target?

How many years supply would that equate to?

Claire Sherratt

Inspector appointed to examine the Oadby and Wigston Local Plan
